## SOLDAN ON EDUCATIONAL FADS.

Superintendent of Instruction Ad dresses Large Audience.

F. Louis Soldan, superintendent of in truction for the St. Louis Public Schools, lectured last night in the High School Au-ditorium on the subject, "Fads in Education." An audience of about 1.5n persons heard his sentiments on this topic.

He divided the subject into the various classes of fads which have come under his observation, and gave amusing illuminations of the practical effect of the application of such infraken ideas, "One class of fads," he said, "might be called fads of fads," he said, "might be called fads of mistaken practice which are based on valid theory. The latter kind are the more numerous.

of mistaken practice which are based on walld theory. The latter kind are the more numerous.

That the boy does not need to be instructed, in the sense which now attached to the word, that he does not need to be disciplined, is mistaken. The old adage that all work and no play makes a dull boy may be true in a sense. But equally true is it that all play and no work does not make a man or a woman.

"At one school where very modern ideas are in effect I know of an inchient which occurred during the observation lesson, which lesson was also calculated to instruct in concentration. Apples was the subject for the lesson. First the pupils same songs about apples. Then they were asked to do simple sams in which apple cut into sections figured. Then they were asked to draw apples. One boy drew a horse instead of an apple. This was a decided breach of discipline, and the boy was required to explain why he drew a horse. He said that he was tired of apples and drew the horse to cat all the apples up."
